To enable mobile operators to achieve net zero goals and sustainable development, Comba strives to innovate and launch Green Antenna and Subsystem Solutions with lower loss rates and high efficiency. On 14 September 2022, we held a webinar to share our insights on the trends, good practices and benefits.

The webinar covered the following topics:

- The Opportunities and Challenges of an Eco-friendly Mobile Network
- Comba's Eco-friendly, High efficiency Antenna Product Design: Technology, Innovations and Advantages
- Comba's High Efficiency Antenna Platform can enable Decarbonization in Today's and Tomorrow's Mobile Networks.
